The world is becoming much smaller by using modern traffic and modern communication means. Life today is much easier than it was hundreds of years ago, but it has new problems. One of the biggest is pollution. Pollution means making something dirty. Pollution comes in many ways. We see it, smell it, drink it and even hear it.

Man has been polluting the earth. The more people there are, the more pollution there will be. Many years ago, the problem was not so serious because there were not so many people. Man is now slowly polluting the world.

Air pollution is still the most serious. It's bad for all the living things in the world, but it is not the only kind of pollution. Water pollution kills fish and pollutes our drinking water. Noise pollution makes us get angry more easily.

The pollution of CO₂ is now the most dangerous kind of pollution. It is because of heavy traffic. If there are fewer people driving, there will be less pollution.
